DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species I – claim 65 (classified in class 715, subclass 539).

Species II – claims 66, 67, 68 (classified in class 706, subclass 47).

2. The species are independent or distinct because of the following:

Species I substantially deals with carriage control, which directs said claim to edit composition or storage control/block control.

Species II substantially deals with application of rules, which direct said claims to knowledge processing systems/rule-based reasoning systems.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, **claims 61-64, 69-70 are generic.**

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2176

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
